

57,000 skilled workers are needed each year to work in this fast-paced, well-paying, multibillion-dollar industry.

Rees
SCHOLARSHIP FOUNDATION

Supporting Future HVACR Technicians

The Clifford H. "Ted" Rees, Jr. Scholarship Foundation was established to assist with the recruitment and competency of future heating, ventilation, air conditioning, and refrigeration (HVACR) technicians. Students preparing for a career in the HVACR industry are encouraged to apply for the **Rees Scholarship**.

With the goal of helping students focus on their studies and overcome financial hardship, the Foundation can award scholarships up to \$2,000 and includes a free NATE Ready-to-Work test. The Foundation proudly supports educational institutions recognized by the Partnership for Air-Conditioning, Heating, Refrigeration Accreditation (PAHRA).

"The Rees Scholarship provided me the necessary funds that I would not otherwise have been able to afford. HVACR is a growing field and strongly understaffed. A career in HVACR is a very knowledgeable decision, and will benefit anyone who wants to take a step into a reliable career."

— Burton, Williamsport, PA

"I worked to pay for class and I saw how my grades suffered...I broke down and took out student loans so I could concentrate on my studies. The Rees scholarship helped with college bills (books, classes) that I would have had to take out of my own pocket."

— Jason, Greenville, IL
